

Process Training Unit (PTU) Capabilities

PlantPax – The Modern DCS

Process Automation Solutions

Characterization

The foundation that solidifies the solution....

Design Standards • Best Practices • Cyber Security

Visualization and Information

The structure that provides visibility, durability, and predictability...

Design Templates • Standardized Program Objects • Highly Visible • Integrated Historian and Batch Control
Asset Management • Fault-Tolerant • Highly Available • System Analytics

Distributed Controls

Unified control that enables consistent, reliable results...

Highly Integrated • Redundant Solutions • Intelligent Controls • Device Analytics
Resilient and Redundant Networks • Process Instrumentation

Services

Providing expert solutions...

Consultation • Systems Design Review • Programming • Training • Instrument Calibration

Visualization Solutions

Design Software • Runtime Solutions • Thin Client Management • Industrial Computers • Industrial Thin Clients • Mobility • Security

Controller Solutions

Redundant Controller Systems • High Availability • Distributed IO • Security • Modular Connectivity

Network Solutions

Network Switches • Redundant Architectures • Automation Network Management • Infrastructure • Security

Information Solutions

FactoryTalk Historian • FactoryTalk VantagePoint • FactoryTalk Batch • FactoryTalk AssetCentre • Device Analytics • Condition Monitoring

Intelligent Motor Control Solutions

Motor Control Centers • Variable Frequency Drives • Intelligent Overload Relays • Power Monitoring

Industrial Data Center Solutions

Fault_Tolerant Servers • Virtualization • Remote Connectivity • Uninterruptible Power • Network Security and Segmentation

Instrumentation Solutions

Mass • Flow • Pressure • Temperature • Level Sensing • Valves

Services

Rockwell/IAC - Install Base Evaluation • Drives Startup • Field Service • ArcFlash • Lockout/Tagout • Training

Hi-Speed Industrial – Motor rewind/repair • Field Service

Trinova – Instrumentation Calibration • Training • Startup/Loop check • Field Service • Third-Party Repair/Calibration/Startup
